Education

The LNM Institute of Information Technology (LNMIIT) Jaipur, Rajasthan
B.Tech in Computer Science & Engineering | CGPA: 7.30/10 *Aug 2023 – May 2027*

Technical Skills

Languages: C, C++, Java, JavaScript, TypeScript, Python, SQL
Backend: Node.js, Express.js, FastAPI, REST APIs, WebSockets, Webhooks, NextAuth, Prisma, Drizzle ORM
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Zustand, Zod
Databases: PostgreSQL, MySQL, MongoDB, Supabase, Qdrant (Vector DB)
AI / ML: LangChain, LangGraph, RAG, Generative AI, AI Agents, Embeddings, Prompt Engineering
Tools: Git, GitHub, Docker, Postman, Linux, Figma, Jira
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, LLD

Internships

Software Engineering Intern – Xpressbees May 2026 – Jul 2026
Python, ReactJS, SQL, Data Analytics, NLP *Pune, India*
- Built an address cleansing pipeline and a location-data migration pipeline to a new provider, reducing incorrect address matches and improving delivery location accuracy and routing.
- Built a distributed hub-clustering pipeline over large-scale geolocation data to replace manually drawn hub boundaries, fixing zone gaps and overlaps and reducing wrong hub selection by 0.5%.
- Developed analytics dashboards visualizing delivery-zone clusters and delivery-agent activity for data-driven workforce decisions.

AI Engineering Intern – AgileDone Tech Jan 2026 – May 2026
Next.js, Python, FastAPI, LangGraph, Docker, Vector DBs *Remote*
- Built a customizable multi-agent AI platform supporting 7+ agent types, configurable knowledge bases, and business-specific workflows.
- Deployed a WhatsApp AI agent for a wellness client serving 1,000+ users, automating onboarding, engagement, and progress tracking.
- Engineered a production-ready system across 5+ channels with RAG pipelines, contextual conversations, and human escalation; deployed a containerized FastAPI service.

Full Stack Developer Intern – Runtime HRMS May 2025 – Jul 2025
React.js, Node.js, Express.js, REST APIs *Jaipur, India*
- Built a responsive 11-step employee onboarding portal with progress tracking, dynamic form validation, step-wise state management, and secure storage of employee records and documents.

Projects

Nexus | *Next.js 15, TypeScript, PostgreSQL, Drizzle ORM, Qdrant, LangGraph, Gemini API* GitHub | Live
- Architected a project management platform unifying Kanban, roadmaps, analytics, and AI chat through a RAG pipeline over tasks, plans, and code.
- Engineered a LangGraph agentic workflow (Planner, Critic, Finalizer) for requirement-to-task decomposition with Zod-validated outputs, plus HMAC-SHA256-verified webhooks for bidirectional GitHub sync.
- Designed a three-collection Qdrant store (tasks, roadmap, code chunks) with 768-dim Gemini embeddings and payload indexes for sub-second context retrieval.
- Enabled real-time multi-user board sync via Supabase Realtime and Zustand, with role-based access control (owner/admin/member) and invite-based team management.

Mockview | *Next.js, TypeScript, PostgreSQL, Prisma, Framer Motion, AI SDK, Speech-to-Text* GitHub
- Built a real-time voice-based mock interview platform with 3 modes, AI-generated questions, speech recognition, and live coaching on communication, pacing, and confidence.
- Implemented resume ATS analysis for 13 roles with PDF parsing, keyword extraction, role-based scoring, and actionable suggestions.
- Designed a dashboard tracking 4 performance dimensions and streaks; integrated secure auth with NextAuth and Prisma on PostgreSQL for accounts, sessions, and interview history.

Achievements & Leadership

Competitive Programming: LeetCode Knight, top 4% globally (rating 1904); Codeforces Specialist (max rating 1450)
Positions: Head of Sponsorship, Desportivos (LNMIIT sports fest); Elected Student Senator, LNMIIT (600+ voters)
